Art Unit: 3673

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4, drawn to a bed assembly, classified in class 5, subclass 653.
- II. Claims 5, 6, drawn to a method of making a bed, classified in class 5, subclass 1.

The inventions are distinct, each from the other because:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the bed of Group I can be made by folding methods other than that of claims 5 or 6 (note page 5, lines 14, 16), or even by omitting folding steps altogether.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Price on 10/28/02 to request an oral election to the above restriction requirement, but did not result in an election being made.

In a brief conversation on 10/28/02, in order to expedite prosecution, Mr. Price indicated that, in response to this office action, he will review and amend the specification to clearly disclose and illustrate all elements such as the "third layer" of claim 1, line 8.

Art Unit: 3673

In response to this action applicant is urged to identify each and every element of the claims with reference to the drawings, with numerals in parentheses. Such numerals will aid in more easily "following" the claims and will help in avoiding "mistakes" but will not in any way limit the scopes of the claims.

Any inquiry concerning this communication should be directed to Alex Grosz at telephone number (703) 308-2498.
